

COVID-19 HEALTH & SAFETY TIP SHEET

For Airport Visitors & Employees

When you are ready to travel, Vantage airports are ready to welcome you safely. We have implemented a robust set of layered health measures at each of our airports to significantly limit the possible transmission of COVID-19 and protect the wellbeing of passengers and employees from curb to gate. These include a mandatory mask requirement, enhanced cleaning, disinfection and ventilation, as well as contactless technologies for airport transactions including check-in and meal ordering and delivery. Airport visitors and employees have a critical role to play, by following these important health guidelines.

- Follow testing and quarantine requirements prior to or upon airport arrival.
- Monitor for COVID-19 symptoms. When sick, isolate. Don't fly. Be responsible.
- If exposed to someone positive for COVID-19, follow your local health authority recommendations to quarantine and test.
- Avoid visiting the airport unless you are travelling or working.
- Fully vaccinated people should still follow all health precautions before, during and after travel.
- From the curb to the gate, plan your trip through the airport to maintain physical distance at all times.
- Wear your mask at all times and do not remove it except for very short periods to eat or drink.
- Disinfect hands after touching surfaces such as check-in kiosks, security bins, payment devices or bathroom fixtures.
- Take advantage of contactless ordering and payment options at the airport.
- Minimize time in restrooms and avoid crowded areas such as boarding gates. Find less crowded areas to wait.
- Alert an airport employee if you see someone not wearing a mask.
- Maintain your distance from others when retrieving checked baggage.
